

# Starter pack & setup instructions

*kristina kolodziejka*

# Pre-requisites

Welcome 🙌 There are no pre-requisites required to import the applications into your environment. Some companies block connectors with DLP's, some don't allow Dataverse, some don't allow creating SharePoint lists - I have built the application using self-contained collections so that all of you can just import the solution into your environments and make the most of the session.

# Structure of the day

I want YOU to learn as much as possible throughout the day and it will be very interactive. We have modules on every subject – UI, UX, HTML, CSS, SVG and accessibility – around 45 minutes of each topic will be theory where I'll walk you through some slides and hands on demos. Each theory will then be followed by an interactive exercise from the **UI/UX-in-a-day Interactive Exercises App** (around 20 mins each).

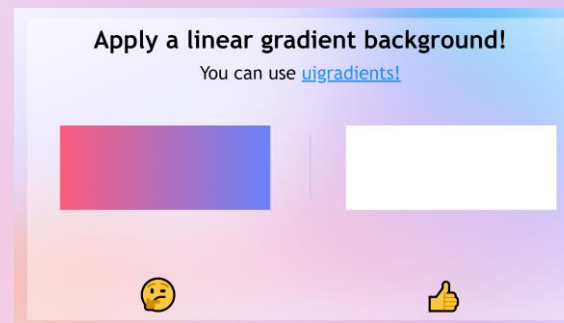

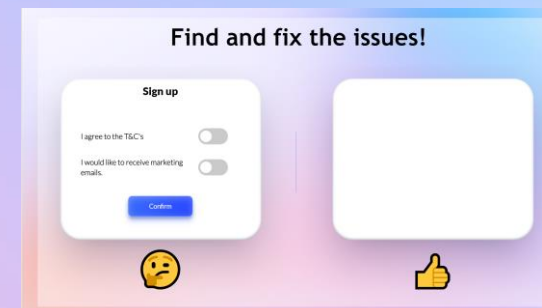

*Kristina Kolodziejka*

# Interactive exercises

There are three sections of exercises – **UI/UX, HTML/CSS and SVG (including animation)** and there are **14** exercises in total with different difficulty levels 😊

The idea is that you will fix the issues in the app, everyone can share a screenshot of what they fixed in the chat, and then we will collectively complete the exercise. Just a fun way to see how your peers approach the same problem and learn together! 😊

# What's included?

In this zip file, you'll find multiple objects:

- **UIUXinaday\_1\_0\_0\_1.zip** – this is a solution containing 3 applications – an app with interactive exercises, the sample app we will be transforming, and the completed app for demo purposes. This solution needs to be imported (please check following slides)
- **UIUX in a day – lab.pdf** – this is the lab for the Extreme Makeover at the end of the day (2 hours) with step by step instructions.
- **Applogoblack.png, applogopeople.text, applogowhite.txt, msgwelcome.txt, pillchartcode.txt** – these assets required for our project. You'll need them during Extreme Makeover

# Solution import

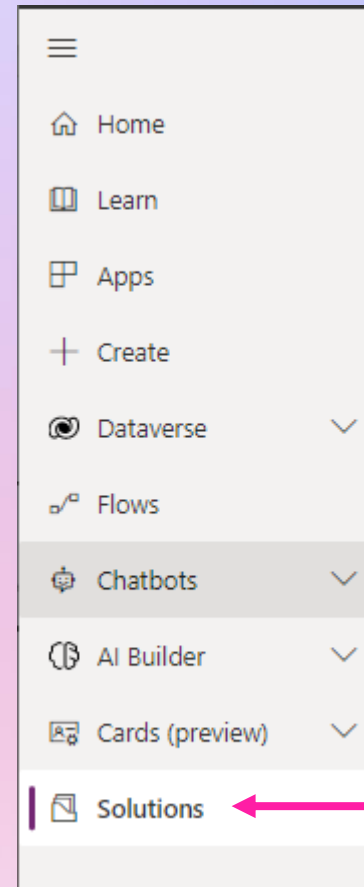

In case you have never worked with a solution before, here's a quick guide on how to import one. Firstly, navigate to your Power Platform **environment** where you'd like to import the applications.

*kristine kolodziejski*

# Solution import

From the menu to the left, select '**Solutions**'.

*Kristina Kolodziejka*

# Solution import

To the top of your screen, you'll find an '**Import Solution**' button in the command bar. Please click on it.

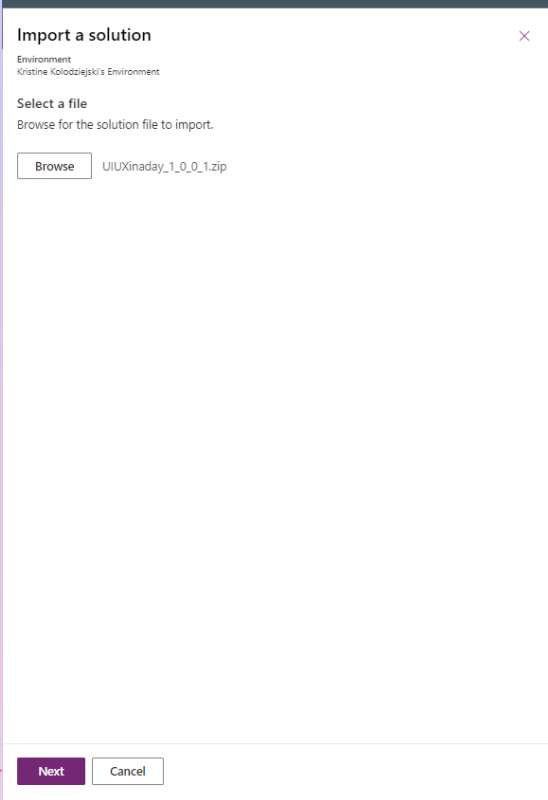

*Kristina Kolodziej*

# Solution import

You will now be asked to browse your computer to find the solution. Please select it and then click '**Next**'.

Import a solution

Environment  
Kristine Kolodziejki's Environment

Select a file  
Browse for the solution file to import.

Browse UIUXInaday\_1\_0\_0\_1.zip

Next Cancel

*kristine kolodziejki*

# Solution import

You don't need to change anything here. Please click on '**Import**'.

# Solution import

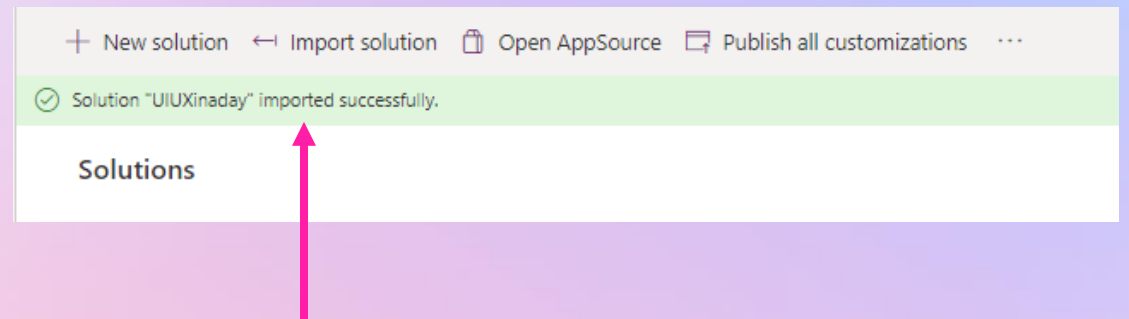

Your solution will now start importing.  
It can take around 5 minutes for this  
solution to import.

*Kristina Kolodziejster*

# Solution import

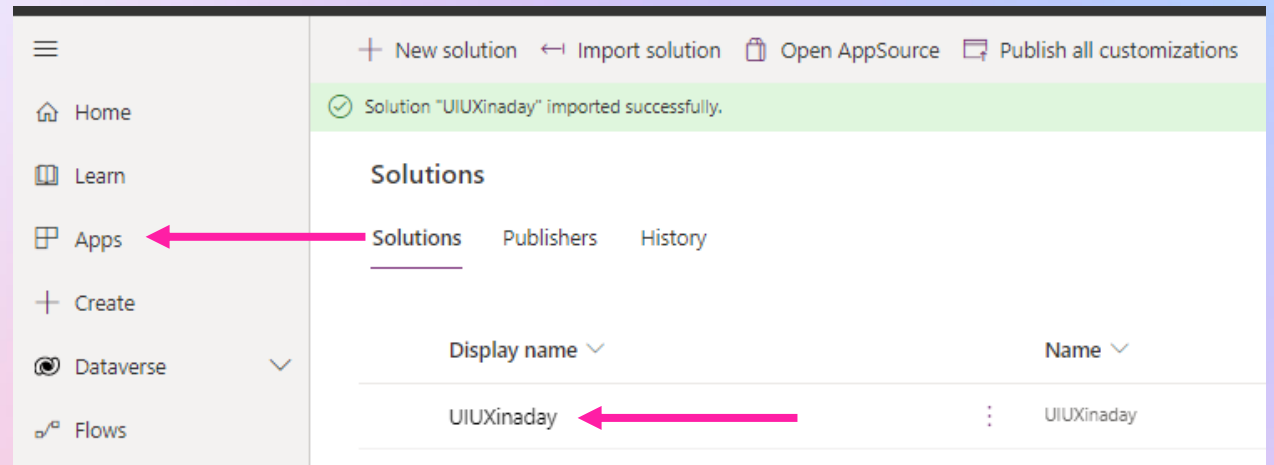

Once imported, you'll see a green notification to say it's been completed **successfully**.

*Kristina Kolodziejster*

# Solution import

To access the applications, you can navigate to **Apps** (please note it can take 10-15 mins for the apps to appear in that view) or you can navigate directly to the solution. If you click on the **UIUXinaday** solution, it will open up the contents.

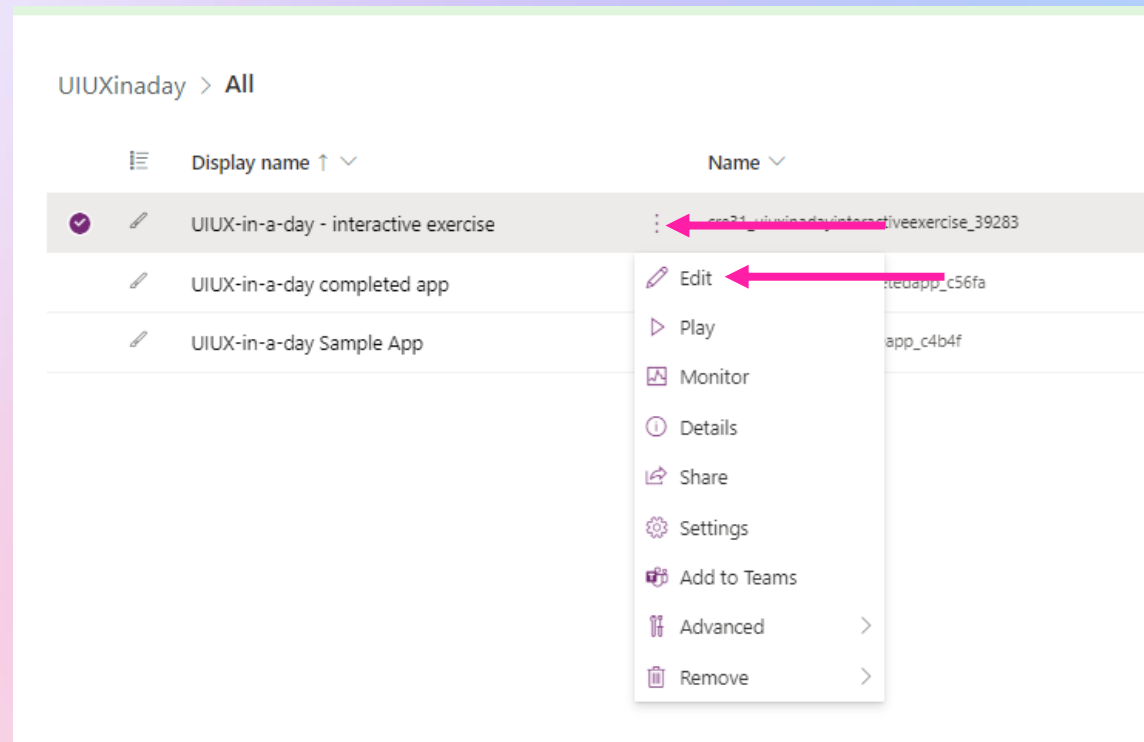

*Kristina Kolodziejster*

# Solution import

You can then click on the **ellipsis**, and then select **Edit** which will open the Power Apps Maker Studio. That's it 😊

*Kristina Kolodziej*

# MOST importantly

**HAVE FUN!** The day should be all about fun and learning together. You can have your camera switched on if you feel comfortable! Don't stress if it takes you longer to absorb the information, or if you don't get things right first time – we've all been there. Do it at your own pace, there's no rush – and you'll be taking your app and labs home with you, so if you want to finish them off at home, or practice more – you'll be free to do it!

**And don't forget to bring plenty of snacks with you! 😊**
